

## Logic Model Example

Inputs	Activities	Outputs	Short-term Outcomes	Mid-term Outcomes	Long-term Outcomes
<i>What we invest</i>	<i>What we do</i>	<i>Our reach</i>	<i>Short-term results</i>	<i>Mid-term results</i>	<i>Long-term results</i>
<ul style="list-style-type: none"> <li>• All resources needed to support the program</li> </ul>	<ul style="list-style-type: none"> <li>• Overall essential items necessary to produce the intended outputs and outcomes</li> </ul>	<ul style="list-style-type: none"> <li>• Direct measurable results of the inputs and activities</li> </ul>	<ul style="list-style-type: none"> <li>• Desired or anticipated changes or benefits to people, organization, or other targeted beneficiaries of the inputs and activities</li> <li>• Short-term are most directly linked to the outputs</li> <li>• Mid-term follow the immediate outcomes</li> <li>• Long-term include the overall lasting results that the program is designed/aims to achieve</li> </ul>		

**External Factors:**

This includes any important external or internal factors that may impact the program implementation or overall outcomes, such as COVID19, funding, policy, changes in leadership, etc.

**Assumptions:**

This includes any key assumptions made in the program activities, output or outcomes or in the evaluation process. For example, that a specific program activity is occurring as designed.
